

SeeUsOnline.org Earthquake Tech

Facts, Education, Preparedness & Response.

Earthquakes are a serious natural disaster all over the world. Sustainable Environmental Education, a 501 (c) 3 nonprofit organization, is poised to offer facts, education, preparedness and response with your help.

On July 27, 2008 Southern California witnessed the largest earthquake in 14 years. At 5.4 on the Richter Scale this seismic activity only is a reminder of the magnitude that is soon to follow.

We are asking you to help us disseminate information to the mass public by joining our emergency Earthquake Tech display. In cooperation with the NEC Group Annual Home Remodeling & Decorating Show plus Eco Expo we are creating a display to be showcased at each one of their shows. But we can't do it without your help.

Don't wait until the last minute - it just could be your last. To donate and to participate in helping us build this display call us at 562-945-6469.
