

# Small Engine Repair...

Repair your own equipment or start a business! This course, offered by Sustainable Environmental Education, is a cutting-edge 12-hour 2-stroke class and an 18-hour 4-stroke class instructed by industry professional, Dan Kato. Your presenter has a rich history unlike anyone in the industry. In these courses, you will be exposed to the 2-stroke and 4-stroke engine. Carburetor adjustments, equipment maintenance, general repairs plus a look at the most recent information in exhaust regulations. In addition, by class end you'll have taken apart an engine and put it back together. Upon finishing you'll receive a Certificate of Completion - a great honor for your resume.

## ...All Types of Power Equipment...
