

The West Coast Whitehouse *Traveling* Vegetable Garden

Bringing the nations vegetable garden to west coast homes

Eleanor Roosevelt's World War II-era Victory Garden was a shining example to Americans that they could grow their own food. And now Michelle Obama is following in her footsteps, taking up the cause by planting a 1,100 square foot edible garden on the South Lawn of the White

*The actual Whitehouse vegetable garden will be 1100 square feet.
The West Coast Whitehouse Traveling Vegetable Garden will feature YOUR products!*

“We are proud, to once again, support SEE and their wonderful displays.”

Alfredo Perez, ANB Industries

House. Her desire is to educate children about locally grown food, inspiring them to eat healthier and encourage their families and community to follow suit.

Join Sustainable Environ-

mental Education (SEE) as we best replicate the garden on the South Lawn with our version of The West Coast Whitehouse *Traveling* Vegetable Garden. Regardless of your political affiliation, proper gardening information is needed now more than ever. We are poised to begin the process of educating the seasoned and beginning gardener on the best way to setup, grow and maintain a successful garden.

This garden concept is unique to the industry. The process to setup a display of this magnitude and move it from venue to venue involves great detail, imagination and manpower. We at SEE are excited to take on this project with your help. Garden elements will include anything and everything that is needed to grow a successful garden: raised bed boarders, weed control fabric, tools, soils and amendments, seeds, plant

food, watering devices, conservation products, etc.

For more information on how to partner-in with us on this extraordinary display that will be featured at several high traffic events please contact a fund-raising specialist at **562-945-6469**.
